

Indiegs^{2K}

Gemini 4:4:4

2K-CinemaDNG RAW-Recording

Unlock the full potential of the indieGS2K with the Gemini 4:4:4 from Convergent Design! Record up to two streams of pristine CinemaDNG-RAW natively from up to two indieGS2K cameras - simultaneously on one recorder. With the standard 512GB SSD-media you can record up to 2 hours for each camera. This is the smallest 2K RAW-recording setup, perfectly matching your visionary productions.

Both products feature cutting edge technology. The indieGS2K is equipped with a high grade 2k CMOS sensor delivering up to 120p RAW over a single 3G HD-SDI connector. It also features live color preview via its built-in 5-inch high quality monitor and on the HD-SDI out connectors.

The entire package is incredibly small. The indieGS2K measures only 40 x 40 x 100 mm with a weight of just 170 g and the Gemini 4:4:4 only 138 x 120 x 37 mm with weight of 612 g. You can easily mount the setup on moving objects, handheld rigs, body-mount rigs, etc.

Two indieGS2Ks can be directly connected to the Gemini's dual HD-SDI inputs. The indieGS2K comes with a built-in Genlock-Sync - and with a minimum inter-axial distance of only 40 mm they can be combined with the Gemini 4:4:4 to form a powerful, small sized 3D RAW solution.

We also offer a selection of specialised accessories, like side-by-side and mirror-rigs, a compact and accurate iris focus control, powering-options, etc.

QUICK START

2D: Connect SDI/out (BNC) on the camera to SDI IN on the Gemini 4:4:4, equipped with at least one SSD

3D: Connect each Camera's SDI/out (BNC) to SDI A IN and SDI B IN on the Gemini 4:4:4, equipped with two SSDs

Power with BatteryPack or Power Supply
